Q-E Journey · *Create. Approve. Comply.*

Content generation and quality management in one journey — from first user need to controlled record.

Most tools manage records once the work exists. Q-E Journey creates the work — and controls it. Med Journey AI generates the regulatory and technical content; direct integration carries it into Q-Essential for ***approval routing, training and compliance***, so content moves straight from creation to control.

CREATE · MED JOURNEY AI

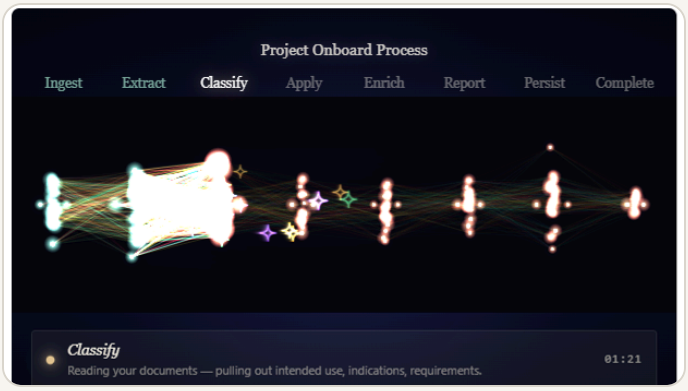

- Onboard: product code, regulatory path, predicates, market summary, assemblies
- URS, design inputs and outputs
- DFMEA through PFMEA, each built from the last
- SME personas aware of the full project record

→ DIRECT INTEGRATION

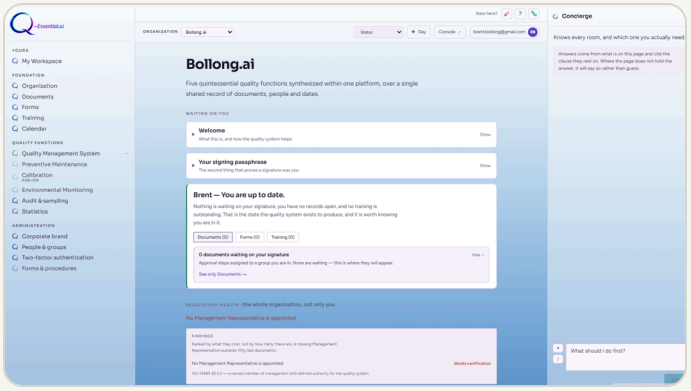

CONTROL · Q-ESSENTIAL

- Automated approval routing and electronic signatures
- Training assigned with each new revision
- Revisions, approvals and audit trails in one record
- ISO 13485 QMS, maintenance, calibration, environmental monitoring and statistics

MJAI · PROJECT ONBOARD

Q-ESSENTIAL · WAITING ON YOU

> *Night and day controls reflect never being alone; the rising sun and the constellations providing guidance for each step of the journey.*

ONBOARD → GENERATE → ROUTE → APPROVE → COMPLY

bollong

One journey, from first draft to *controlled record.*

Generated content earns its place only after review. Q-E Journey builds that review into the path: each MJAI document is routed to the right approvers in Q-Essential, signed, trained against and kept under revision control with a full audit trail. **The software drafts and routes. Your organization approves.**

01 · ONBOARD
Code · path · predicates

→

02 · GENERATE
URS → DFMEA → PFMEA

→

03 · ROUTE
To the right approvers

→

04 · APPROVE
Signed · trained

→

05 · COMPLY
Revisions · audit trail

< 1 day

Substantial DFMEA content for a viral diagnostic test kit — work that once took weeks or months

5 · 1

Five quintessential quality functions under one license

$0

Per-user fees — priced by regulatory stage and product maturity

- **ONE SHARED RECORD** — Personas draft with the full project in view; approvers, trainees and auditors work from the same record.
- **A QMS THAT PAYS** — Built on a challenge: an ISO 13485 system that pays for itself rather than driving cost.
- **FOCUSED EXPERTS** — Consultants review, correct and close evidence gaps instead of drafting — and can host a client's system, keeping a 10% royalty when it graduates.
- **AI APPROVES NOTHING** — "...the organization shall..." — your people review, sign and stand behind every record.

> *"Whether an entrepreneur or a 150-year old company, a destination is set and the journey reflects the effort and path."*
