Q-Essential · *Quintessential Quality*

~Essential.ai

Compliance and cost mitigation for the next generation of medical devices.

Earth, Air, Fire, Water — and Aristotle's fifth, Aether. The ancients described the world as four elements bound by a quintessence. Q-Essential is built the same way: four licensable quality functions, with ***Statistics as the aether*** running through them all, over a single shared record of documents, people and dates.

Fully integrated with Med Journey AI. The power of meaningful content creation, coupled with ***automated approval workflows and training***, gives your organization a rich, consistent quality environment — at a fraction of the cost of today's offerings.

FOUR ELEMENTS + THE AETHER · ONE SHARED RECORD

● 01

ISO 13485 QMS

Documents, forms, training and audit — signed, versioned and traceable.

● 02

Preventive Maintenance

Equipment schedules, due dates and completed-work records.

● 03

Calibration

Instrument status and calibration history, ready for audit.

● 04

Environmental Monitoring

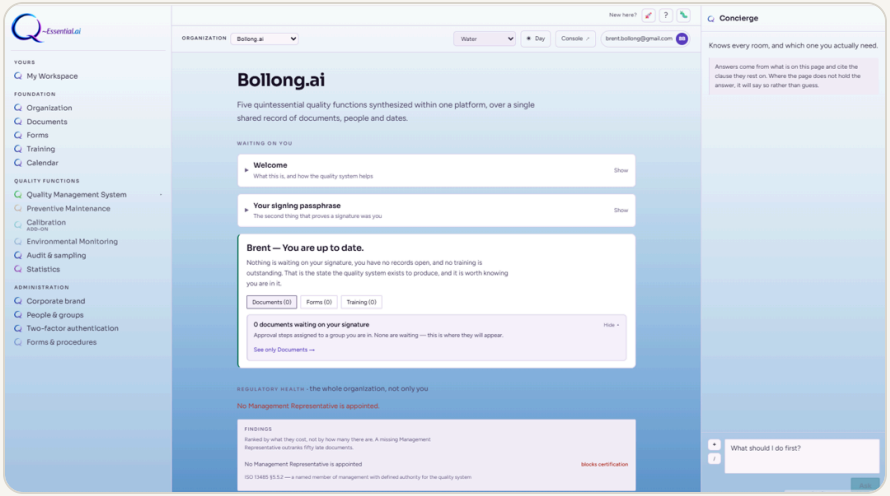

Controlled-environment readings tracked against limits.

✦ AETHER

Statistics

The fifth element — analysis that binds the other four and turns records into evidence.

DAY VIEW · WATER THEME

REGULATORY HEALTH
Findings ranked by what they cost, not how many there are — a missing Management Representative outranks fifty late documents.

CONCIERGE PERSONA
Knows every room. Answers cite the clause they rest on — or say so rather than guess.

WAITING ON YOU
Signatures, forms and training due — in one place.

MJAI → APPROVAL → TRAINING → CONTROLLED RECORD

bollong

Content in. *Approved, trained records out.*

Med Journey AI creates the design and process content. Q-Essential takes it into electronic quality management — routing each document through **automated approval workflows**, assigning the training a new revision demands, and keeping revisions, approvals and audit trails in one controlled environment.

01 · MJAI CREATES
Design & process content

→

02 · APPROVE
Routed, signed · passphrase + 2FA

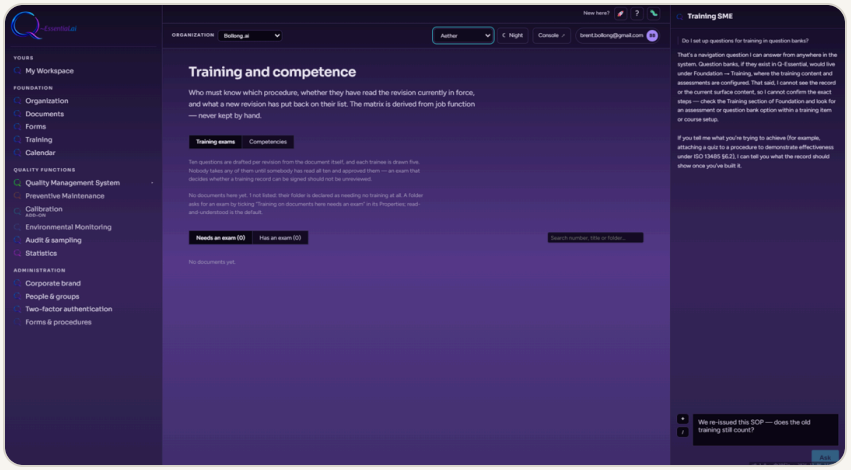

→

03 · TRAIN
Exams drafted per revision

→

04 · CONTROL
Revisions · audit trail

NIGHT VIEW · AETHER THEME

Training that keeps pace with every revision

DRAFTED FROM THE DOCUMENT
Ten questions per revision; each trainee draws five.

DERIVED, NOT HAND-KEPT
The training matrix follows job function automatically.

TRAINING SME PERSONA
“We re-issued this SOP — does the old training still count?” Ask in plain language; answers draw on your system and ISO 13485.

FRACTIONAL COST	Five integrated quality functions at a fraction of the cost of today’s offerings.
PRICED BY STAGE	Pricing follows your regulatory stage and product maturity — **not seat count** — so everyone who takes part in quality can be included.
CONSULTANT-HOSTED	Consultants host a client’s system as it grows; when it graduates, they keep a 10% royalty.
POLICY & SECURITY RICH	Built for what a quality system really is — signatures, passphrases, two-factor authentication and controlled access.
AI APPROVES NOTHING	Personas draft, explain and cite. Your people review, sign and stand behind every record.

See bollong.ai for details. Q-E Journey brings Med Journey AI and Q-Essential together — or connect MJAI to your existing eQMS by API.
